RE: Water Quality Monitoring Requirements – North Mecklenburg Landfill (Permit # 60-13)

Dear Mr. Gilkerson:

The Solid Waste Section has reviewed your request of October 23, 2003 to reduce monitoring requirements to annually for phases I and II at the North Mecklenburg Landfill. Monitoring wells for phases I and II are currently being sampled semiannually.

Before an adjustment can be considered in monitoring requirements at the North Mecklenburg Landfill, a closure notice for the two phases of concern must have been issued by the Solid Waste Section, and five years post closure semiannual monitoring must have been completed. Although waste is no longer being placed in phases I and II, a closure notice has not been issued for either phase. Therefore semiannual monitoring is required until such time the facility is eligible for a review of monitoring requirements.

If you have any questions, please call me at (919) 733-0692, extension 257.

Sincerely,

*Larry Rose*
